517

Care, shared.

517

Care, shared.

A calm mobile app that helps family caregivers coordinate care together, so support feels shared, clear, and manageable.

Brand
517

Promise
Care, shared.

Positioning

517 makes family care easier to coordinate without making it feel clinical or urgent. It gives caregivers a shared place to see what matters today, understand what is next, and support one another with less pressure.

Design direction
Warm, calm, clear, and quietly supportive.

Brand principles

Every screen should make care feel more understandable, more shared, and kinder to the person giving it.

Calm over urgent
Use gentle hierarchy, clear next steps, and reassuring language. Reserve visual urgency for situations that truly need immediate attention.

Shared not solo
Show that care is a circle of people. Make responsibilities visible, acknowledge contributions, and help families coordinate without blame.

Plain words
Choose familiar language over clinical terms. Keep labels short, direct, and easy to understand at a glance.

Care for the carer
Respect the time, energy, and emotional load of caregivers. Offer support without adding pressure or judgment.

Colour palette

Use a warm Oat foundation with Deep Pine for primary text and structure, restrained Terracotta and Marigold accents, Sage support tones, and Alert Brick only for urgent or missed states.

Role	Colour	Hex value
Primary	Deep Pine	#1F3D36
Primary	Hearth Terracotta	#C8553D
Supporting	Sage	#8FB39A
Supporting	Marigold	#E9A23B
Supporting	Oat	#F6EFE4
Supporting	Stone	#6B6A64
Alert	Alert Brick	#A3312A

Typography

Fraunces brings warmth and editorial character to headings. Inter keeps body copy clear, practical, and easy to read on a mobile screen.

Level	Type treatment	Use
Display	Fraunces, large and expressive	Brand name and major titles
Section	Fraunces, clear hierarchy	Section headings and card titles
Body	Inter, minimum 16px	Instructions, labels, and supporting copy

Hierarchy
Use size, weight, and spacing before colour. Keep one clear idea per line or card.

Readability
Keep body copy at or above 16px wherever possible and maintain accessible contrast.

Iconography

Use rounded line icons that feel friendly, legible, and reassuring at mobile sizes. Icons should support the words, never replace essential labels.

Shape
Prefer simple forms, soft corners, and generous negative space. Avoid sharp, technical, or overly detailed symbols.

Stroke
Keep stroke weight consistent across the set. Use the same visual rhythm for navigation, tasks, and support actions.

Scale
Design icons to remain recognizable at mobile sizes. Give them enough space to breathe inside controls and cards.

Meaning
Use familiar symbols and pair them with plain-spoken labels when an action or state needs extra clarity.

Icon rule
Rounded line icons, consistent stroke weight, soft corners, and clear labels keep the experience calm and inclusive.

Mobile UI components

Static examples for a calm, scannable mobile interface. Use rounded cards, generous spacing, and Deep Pine structure with restrained accents.

Primary button
Add task
Use for the main action on a screen. Keep the label short and direct.

Secondary button
View details
Use for helpful but less prominent actions. Preserve a clear border and comfortable tap area.

Task card
Morning medication
Today · Shared with Care Circle
Done
Use one clear task, one time cue, and one visible state per card.

Done
Use for completed care tasks.

Due soon
Use for an upcoming task that needs attention.

Missed
Use only for urgent or missed states.

Voice and copy

Write as a calm, capable companion: warm without being sentimental, plain-spoken without being blunt, inclusive without making assumptions, and supportive without adding pressure.

Use	Writing direction
Warm	Acknowledge the person behind the task. Use human, considerate language.
Calm	Lead with what is useful now. Avoid alarmist wording and unnecessary urgency.
Plain-spoken	Use familiar words, active voice, and short sentences. Explain rather than assume.
Inclusive	Respect different families, roles, routines, abilities, and ways of giving care.
Supportive	Offer a next step without blame. Make it clear that care is shared, not solo.

Copy check
If a caregiver is tired or reading quickly, the meaning should still be clear on the first pass.

Design checklist

Before release, check that every screen feels like 517: calm, shared, clear, and considerate.

- [ ] Use the exact brand name “517” and tagline “Care, shared.”
- [ ] Keep Deep Pine for primary text and structure, with a warm Oat foundation.
- [ ] Use Hearth Terracotta and Marigold as restrained accents, not constant alerts.
- [ ] Use Sage for supportive states and Alert Brick only for urgent or missed states.
- [ ] Keep body copy at or above 16px wherever possible.
- [ ] Use Fraunces for headings and Inter for body text with a clear hierarchy.

- [ ] Keep rounded cards, soft corners, generous spacing, and consistent icon stroke weight.
- [ ] Pair icons with clear labels and keep navigation readable at mobile sizes.
- [ ] Use plain, inclusive language that supports caregivers without blame or pressure.
- [ ] Check contrast, tap comfort, focus clarity, and legibility before handoff.
